General info:

I have added some of my research on how to add the design in Eclipse.

http://www.vogella.com/tutorials/Android-Drawables/article.html
(one of my sources for drawable info)

sp = text size unit in Android
Not sure what will be a good text size in this unit, can you try 14 sp for normal body text, and adjust it if you think it is too small/big?

dp = Android's very own unit, instead of px. In mdpi resolution 1dp=1px in a Photoshop document with 72dpi.

sp is scale-independent pixels.
dip is Density-independent pixels.

Found this on text sizes:

Text size

Type	Dimension
Micro	12 sp
Small	14 sp
Medium	18 sp
Large	22 sp

Launcher icon

or

or

or

or

or

or

ic_launcher.png
ic_launcher2.png
ic_launcher3.png
ic_launcher4.png
ic_launcher5.png
*ic_launcher6.png*
ic_launcher7.png

Apparently I lost my ability to make decitions over the easter, so the choice is yours:
Which one do you think is best?
(I think maybe number 3 from top, or the last one?)

Action bar

invisible ink

invisible ink

One of these?

Ink Register

(Linear?) layout
Padding: top 38dp left & right: 17dp
bottom: 28dp

Background
Color: #f1f1f2

Text
Padding left: 17dp
Align left
Center vertical in text box
Text size: 16 sp? Or text "medium"?
Font: Roboto Light.
Font color: #000000

Font color for placeholder: #999999

Text box
color: #ffffff
Chosen box: stroke color #d0d2d3
(inside of shape if possible?)
Height: 48dp
Width: 100% (Fill parent/layout)

Text
Font size: 16 sp? Or text "medium"?
Font: Roboto
Font style: light

Button
Height: 48dp
Width: 100% of parent (layout)
Color: # becbf8
Font style: regular
Font size: same as "Text"
Rounded corners?*

Text/link at bottom
Color: #2bc7b5
Size: Same as "Text"
Font style: regular
Should some of the text be underlined (to show it's a link)?
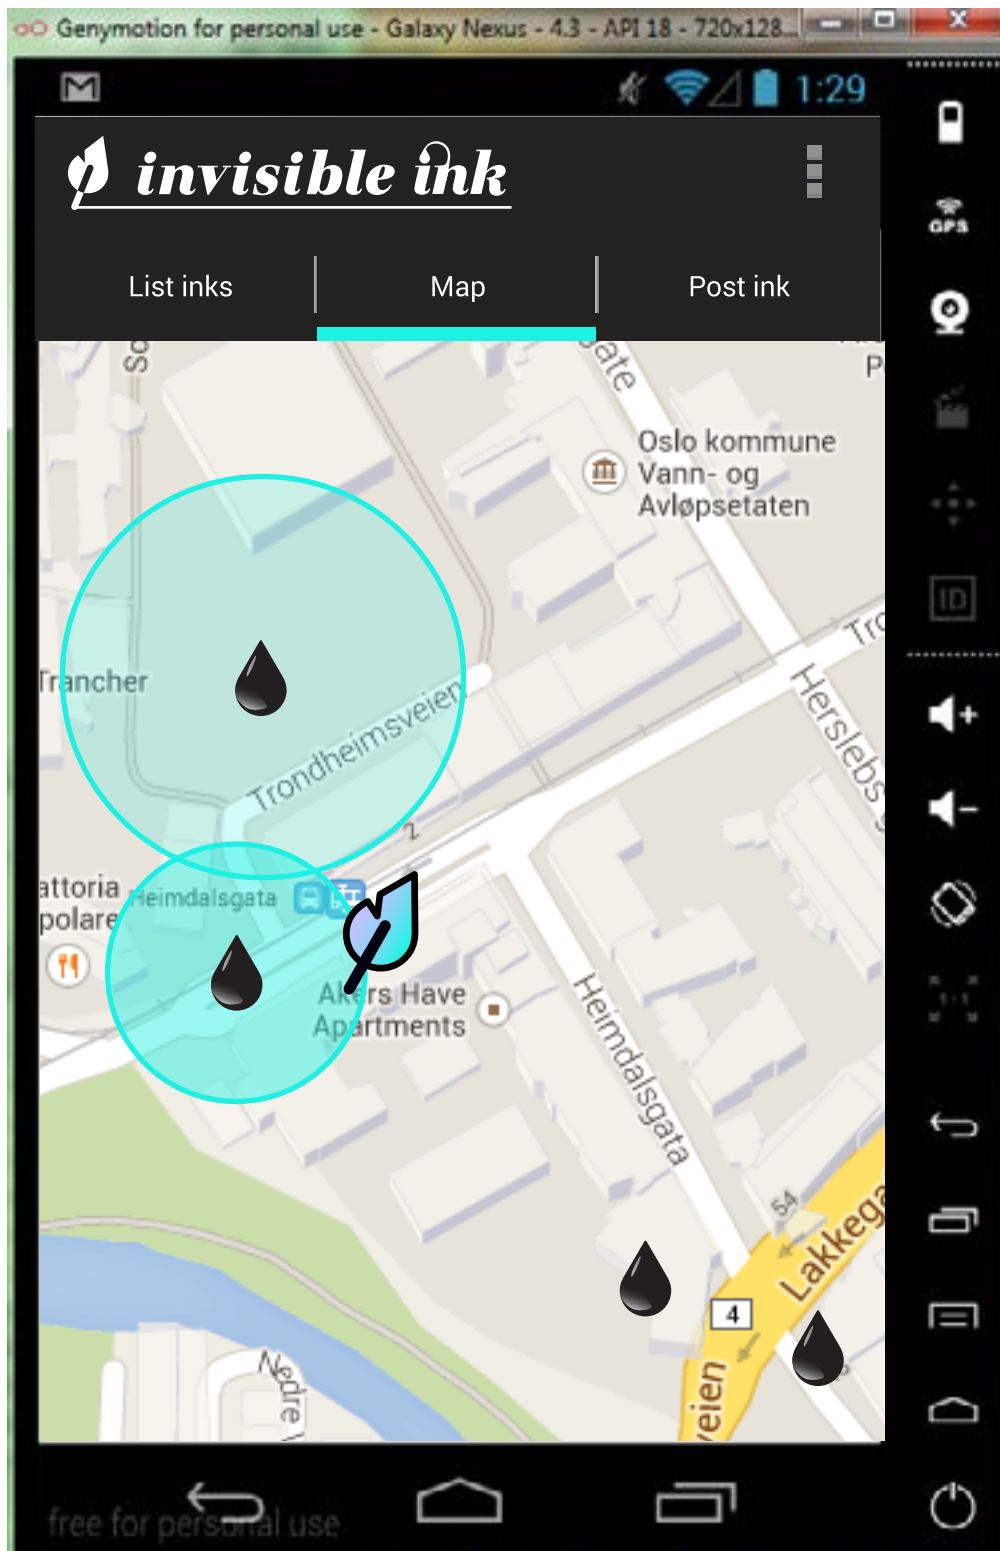

*
rounded corners on shape (or button I guess):
<corners android:bottomRightRadius="7dp" android:bottomLeftRadius="7dp"
    android:topLeftRadius="7dp" android:topRightRadius="7dp"/>

I'm not sure how many dp we should use to get the effect.

Sign in

Same layout and styles as on "Ink register".

Map

Ink drop map
ic_drop_map.png

Without radius if it's too far away.

With radius within xx m/km?

Radius Ink
Circle:
Transparancy 20 %
#00ffdf
Stroke circle:
1 dp
#00ffdf
Ink drop centered in circle.

Change radius appearance when you're inside it? Mabye Transparancy up to 45 %?

Quill / this is you
ic_quill_map.png

Left bottom corner of icon = where you are on the map.

Map, preview ink

Padding on (linear?) layout
top/left/right: 17dp, bottom: 0dp

Gradient*
from #c1c2ff
to #00ffdf
Transparancy: 50%

x button
btn_x.png
btn_x_pressed.png
Align to top. Padding right: 24dp.

Ink drop
ic_drop_preview.png
Centered horizontally and vertically on the top 185 dp of the screen (or on the top 45% of the screen).

Notepaper**
notepaper_top.png, notepaper.png, notepaper_stroke.png
Width: 100% (of available width from parent -> the layout)***
Align with bottom of ink drop "area".

Text
Text size: 16 sp? Or text "medium"?
Font: Roboto Light.
Align left
Padding (from *notepaper.png*): top 0dp.
Left and right: 17dp. Bottom: 30dp.
Color: #000000

Arrow
btn_arrow_preview.png, btn_arrow_disabled.png
Centered
Padding from bottom: 14dp

---

*
I don't know if this works, but here is some research on the problems we discussed conserning gradient/fill entire background. Hopefully it's good solutions.

Fill background with gradient
http://stackoverflow.com/questions/6154343/how-to-fill-a-view-with-a-gradient-background-color

Make gradient:
http://stackoverflow.com/questions/2666341/how-to-use-android-gradientdrawable

**
Maybe we could make a 9png drawable or a xml drawable for the notepaper? If this is something you can do in Eclipse? (havn't figured out how they are made yet) Then we could say that the image would scale from below the rugged border (for screens that are higher or shorter),

and the grey line could also be a part of the image, instead of a separate one.
About 9.png:
http://petrnohejl.github.io/Android-Cheat-sheet-For-Graphic-Designers/#nine-patch

***
In Eclipse - layout parameters: weight (how many % of width) + set "wrap content" to "fill parent"

Ink, full size

(Linear?) layout
Padding: top/left/right: 17dp, bottom: 0dp

Gradient
from #c1c2ff
to #00ffdf
Transparancy: 50%

x button
btn_x.png
btn_x_pressed.png
Align to top of layout. Padding right: 24dp.

Notepaper**
notepaper_top.png, notepaper.png, notepaper_stroke.png
Width: 100% (of available width from parent -> the layout)***
padding top: 9dp

Text
Same as in Ink preview

Arrow
(Do we need it for further scrolling?)
*btn_arrow_preview.png*
*btn_arrow_disabled.png*
Centered
Padding from bottom: 14dp
(set a bigger touch-sensitive area around button?)

Ink, preview many inks

More info later, when we are ready to implement

Ink feed

(Linear?) layout
Padding: top/left/right: 17dp, bottom: 0dp

Gradient
from #c1c2ff
to #00ffdf
Transparancy: 50%
(on map background or without?)

Notepaper**
notepaper_top.png, notepaper.png, notepaper_stroke.png
Width: 100% (of available width from parent -> the layout)***
padding: top 9dp

Drop
drop_list.png (normal), drop_list_viewed.png (viewed before), drop_list_expires.png (expires soon)
Padding: left 17dp, right 9px.z
Align top with top of text box.

Text
Padding right: 17dp.
Ink text same as in Ink preview (unless you think it is too big). Top of first textbox align to top of *notepaper.png.*

Date and time: "small" or 12-13sp?
Color: #999999
Font style: regular
Align left

Padding between Ink post and Date: 0dp?
Padding between Date and Expires: 10dp

Expires soon: same size as date and time.
Color: #2bc7b5
Font style: Italic

Arrow
btn_arrow_preview.png
*btn_arrow_disabled.png*
Centered to text box
Padding: top 5 dp

Dotted line
inkpost_divider.png
Same width as *notepaper.png* (Set as child to *notepaper.png*?)
Padding: top 5 dp, bottom 10dp

Post Ink

(Linear?) layout
Padding: 17dp (all sides)

Background
Color: #f1f1f2

Notepaper**
notepaper_top.png, notepaper.png, notepaper_stroke.png, notepaper_stroke_bottom.png
Width: 100% (of available width from parent -> the layout)***
padding: top 9dp
Height *notepaper.png*: ca 37dp (depends on font size)

Text
Padding left, right & bottom: 17dp.
Ink text same as in Ink preview.
Top of textbox align to top of *notepaper.png.*

Font color for placeholder: #999999
Font color for normal text: #000000
Font style: light
Align left

Radius
Color line & small circle: #2bc7b5
Color big circle: #00ffdf
Transparancy big circle: 30%

Check box
Color v (if you can change it?): #2bc7b5

Date & time
Accent color/the lines (if you can change it?): #2bc7b5

Button
Height: 48dp
Width: 100% of parent (layout)
Color: # becbf8
Font style: regular
Rounded corners?*

Keyboard comes under button when typing?

Leave vertical spacing between the elements as they are now?

*
rounded corners on shape (or button I guess):
<corners android:bottomRightRadius="7dp" android:bottomLeftRadi-us="7dp"
    android:topLeftRadius="7dp" android:topRightRadius="7dp"/>

I'm not sure how many dp we should use to get the effect.

Post Ink

Or like this?
